)URNAL OF STATISTICAL PHYSICS — Volume 36, 1984

ıe *Journal of Statistical Physics* accepts original and review papers in the fields of statistical mechanics and ermodynamics of equilibrium and nonequilibrium processes. Papers on plasma physics, nonlinear namics, biology, stochastic processes, fluid dynamics, and chemical physics are also accepted provided ey are of general interest in relating macroscopic behavior to microscopic interactions.

ıe general criteria for contributions are as follows. Papers should present important new results, and view papers should provide new insights. Clarity of presentation is important in all cases but, in many ses, particularly for review papers, it is the decisive criterion for publication. Each paper should be written such a way that a clear understanding of the problem and of the results can be obtained from the abstract d introduction. Given that a paper meets these criteria, shorter papers are greatly preferred to longer ones. summary, the journal publishes papers with important new results or insights written clearly and concisely.

ıe journal also accepts communications in the following departments: news of meetings, questions and swers, book reviews, and letters to the editor.

)ITOR-IN-CHIEF
el L. Lebowitz, Department of Mathematics, Rutgers University, New Brunswick, New Jersey

SSISTANT TO THE EDITOR
dy Williamson, Department of Mathematics, Rutgers University, New Brunswick, New Jersey

)ITORIAL BOARD
ichael Aizenman, Rutgers University, New Brunswick, New Jersey
hn M. Deutch, Massachusetts Institute of Technology, Cambridge, Massachusetts
an-Pierre Eckmann, University of Geneva, Geneva, Switzerland
. H. Ernst, University of Utrecht, Utrecht, The Netherlands
itchell Feigenbaum, Los Alamos National Laboratory, Los Alamos, New Mexico
o S. Garcia-Colin, Universidad Autonoma Metropolitana, Mexico City, Mexico
eldon Goldstein, Rutgers University, New Brunswick, New Jersey
)bert B. Griffiths, Carnegie-Mellon University, Pittsburgh, Pennsylvania
ristian Gruber, Laboratoire Physique Théorique, Lausanne, Switzerland
an-Pierre Hansen, Laboratoire de Physique Théorique des Liquides, Paris Cedex, France
alvin H. Kalos, New York University, New York, New York
liot H. Lieb, Princeton University, Princeton, New Jersey
ızime Mori, Kyushu University, Fukuoka, Japan
ıarles Newman, University of Arizona, Tucson, Arizona
egoire Nicolis, Université Libre de Bruxelles, Bruxelles, Belgium
rico Presutti, Universita di Roma, Roma, Italy
)ward Reiss, University of California, Los Angeles, California
wrence S. Schulman, Technion, Haifa, Israel
. G. Sinai, Landau Institute of Theoretical Physics, Moscow, USSR
rnard Souillard, Centre de Physique Théorique, Palaiseau, France
omas Spencer, New York University, New York, New York
:rbert Spohn, Rutgers University, New Brunswick, New Jersey
etrich Stauffer, Institut für Theoretische Physik, Köln, West Germany
ichael J. Stephen, Rutgers University, New Brunswick, New Jersey
)rge H. Weiss, National Institutes of Health, Bethesda, Maryland
njamin Widom, Cornell University, Ithaca, New York

)OK REVIEW EDITOR
)rge H. Weiss, National Institutes of Health, Bethesda, Maryland

Proceedings of a Symposium on Fractals in the Physical Sciences, held at the U.S. National Bureau of Standards, Gaithersburg, Maryland, 21–23 November 1983

ARTICLES

Dedication ii

Preface iii

Squig Sheets and Some Other Squig Fractal Constructions 519
Benoit B. Mandelbrot

Comment on the Equivalence between Fracton/Spectral Dimensionality and the Dimensionality of Recurrence 541
Benoit B. Mandelbrot

A New Model of Percolation Clusters 545
James A. Given and Benoit B. Mandelbrot

Random Walk Statistics on Fractal Structures 547
R. Rammal

Fractal Behavior in Trapping and Reaction: A Random Walk Study 561
J. Klafter, A. Blumen, and G. Zumofen

Single Random Walker on Disordered Lattices 579
P. Argyrakis, L. W. Anacker, and R. Kopelman

Fractal Chemical Kinetics: Reacting Random Walkers 591
L. W. Anacker, R. Kopelman, and J. S. Newhouse

Propagation and Trapping of Excitations on Percolation Clusters 603
Itzhak Webman

Transport in a Disordered One-Dimensional System: A Fractal View 615
Robert J. Rubin

Lévy (Stable) Probability Densities and Mechanical Relaxation in Solid Polymers 625
John T. Bendler

Williams–Watts Dielectric Relaxation: A Fractal Time Stochastic Process 639
Michael F. Shlesinger

Fractal Structures in Turbulence 649
Itamar Procaccia

Transfer Processes in Fractal Media 665
Alain Le Mehaute

Transport and Percolation in Disordered Systems—A Self-Consistent Time-Local Approach 677
Johan Nieuwoudt and Shaul Mukamel

Is the Dimension of Chaotic Attractors Invariant under Coordinate Changes? 687
E. Ott, W. D. Withers, and J. A. Yorke

Scaling Behavior of Surface Irregularity in the Molecular Domain: From Adsorption Studies to Fractal Catalysts 699
Peter Pfeifer, David Avnir, and Dina Farin

Monte Carlo Studies of Two Measures of Polymer Chain Size as a Function of Temperature 717
C. M. Guttman

Dynamics of Fractal Structures 735
R. Orbach

Patterns of Energy Levels and Spectra for Polyatomic Molecules 749
William G. Harter

The Fractal Interpretation of the Weak Scattering of Elastic Waves 779
Bruce J. West and Michael F. Shlesinger

Hierarchical Models and Chaotic Spin Glasses 787
A. Nihat Berker and Susan R. McKay

Magnetic Correlations on Fractals 795
Amnon Aharony, Yuval Gefen, and Yacov Kantor

On the Fractal Dimension and Correlations in Percolation Theory 807
A. Kapitulnik, Y. Gefen, and A. Aharony

Percolation Scale Effects in Metal–Insulator Thin Films 815
Aharon Kapitulnik and Guy Deutscher

Partial Dimensional Sequences and Percolation 827
Yuval Gefen, B. B. Mandelbrot, A. Aharony, and A. Kapitulnik

Percolation on Infinitely Ramified Fractals 831
S. Havlin, D. Ben-Avraham, and D. Movshovitz

Application of Fractal Concepts to Polymer Statistics and to Anomalous Transport in Randomly Porous Media 843
H. Eugene Stanley

Multiparticle Fractal Aggregation 861
Richard F. Voss

Particle Aggregation versus Cluster Aggregation in High Dimensions 873
R. C. Ball and T. A. Witten

Fractal Dimension and Grand Universality of Critical Phenomena 881
Fereydoon Family

Field Theory, Curdling, Limit Cycles, and Cellular Automata 897
Edmund A. Di Marzio

Stochastic Model for Dielectric Breakdown 909
L. Pietronero and H. J. Wiesmann

Scientific Program 917

Posters 921
